October 5 - 8, 2023
ITC Royal Bengal, Kolkata

KOLKATA

Welcome

Dear Friends and Colleagues,

Greetings from Kolkata, the City of Undying Spirit.

We consider it an honour, to have been given the responsibility of hosting the 33rd Annual Conference of Indian Society of Organ Transplantation - ISOT 2023 Kolkata - to be held from October 05 – 08, 2023 at ITC Royal Bengal, Kolkata.

This conference will be of interest to all transplant clinicians (both physicians and surgeons), transplant pathologist, basic scientists, researchers and paramedical staff working in field of transplantation that represents kidney, liver, heart, lungs, pancreas, intestine and composite tissue. We are working hard to disseminate and exchange knowledge and to promote scientific research in various aspects of transplantation. The conference will be a grand platform to strengthen the technical co-operation between clinicians, scientists and others involved in the field of transplantation

It is a city steeped in a multicultural history with many monuments of note, which stand as glorious witness to their time. The multicultural boiling pot has also left behind something less tangible but something equally robust. We take pride in being home to people of all colour creed and religion. You will be visiting this city at the festive season of Bengal. The entire city gets transformed for Durga Puja. Artistic imagination runs riot. The populace slows down to celebrate life.

We hope you will all participate in this for it to become a grand success. Stay safe and stay healthy!

Warm regards
